Sustained investment in infrastructure and innovation are crucial drivers of economic growth and development. Tourism development relies on good public and private infrastructures.

The sector can influence public policy for infrastructure upgrade and retrofit, making them more sustainable, innovative and resource-efficient and moving towards low carbon growth, thus attracting various sources of foreign investment. Furthermore, tourism promotion could attract financial investment for construction of social infrastructure.

Achieving the SDGs through tourism: Toolkit of Indicators (TIPs) publication will allow users to explore tourism’s role in achieving SDG 9 and discover links and connections tourism have with selected SDG 9 targets.

Each chapter in Part II of TIPs is dedicated to one SDG. In the chapter for SDG 9, users will be introduced to selected targets and potential indicators (note: Indicators are non-exhaustive and adaptable) for tourism projects to build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

**Selected SDG 9 Targets:** 9.1 | 9.3 | 9.4 | 9.5 | 9.c

There are five targets within SDG 9 that are deemed to ensure the promotion of inclusive and sustainable industrialization and innovation.

These targets have been selected to base the potential project indicators.

In the following pages, you will find:

- A visual aid which illustrates the connection between the selected SDG 9 targets with various themes, sub-themes and connection with other SDGs and targets.

- Snapshot of the tourism-related SDG 9 targets including short elaboration of its connection with tourism, together with examples of potential indicators.
Tourism’s contribution to Target 9.1 can be seen through the improvement of visitor accessibility, including regional and transborder infrastructure which supports the economic development and well-being of local residents. Quality, reliable, and sustainable infrastructure affects different key areas which in different ways will enhance the delivery of tourism services, while benefiting the local populations. The development of transportation infrastructure, such as road, airport and ports in the context of tourism sector development, will diversify the logistics and decrease the time dedicated to transportation. Improvement of accessibility of transportation infrastructure for all may contribute to the increase of the number of visitors and the success/growth of tourism businesses.

Potential indicators in this target are grouped by the following **Theme** and **sub-theme**:

- **Infrastructure** / **Transport**
- **Business Development** / **MSMEs**
- **Education and training** / **Capacity building**
- **Financing** / **Access to finance**

Examples of potential indicators:

- Number of new tourism jobs created from the development/improvement of transportation infrastructure
- Number of passenger and/or to/from a destination, by mode of transportation
- Number of freight volumes to/from a destination by mode of transportation

And more..
9.3 INCREASE THE ACCESS OF SMALL-SCALE INDUSTRIAL AND OTHER ENTERPRISES, IN PARTICULAR IN DEVELOPING COUNTRIES, TO FINANCIAL SERVICES, INCLUDING AFFORDABLE CREDIT, AND THEIR INTEGRATION INTO VALUE CHAINS AND MARKETS.

By improving access to financial services for tourism businesses, in particularly MSMEs, as well as supporting the integration into the local tourism sector, tourism enterprises can potentially grow and improve their means of production or operation methods and boosting local productivity. Adequate funding can support the development of innovation and digitalization in tourism and their application in business operations, as well as enhancing the travel experience, largely transforming the sector as an important source of direct employment and integration of small-scale enterprises into tourism value chains and markets.

Potential indicators in this target are grouped by the following Theme and sub-theme:

- Business Development / MSMEs
- Education and training / Capacity building
- Financing / Access to finance

Examples of potential indicators:

- Whether there are incentive programmes to support the access of businesses, in particular MSMEs, to the tourism value chain (Yes/No)
- Number of capacity building actions for tourism entrepreneurs to access the value chain and markets
- Number of tourism businesses, in particular MSMEs, having access to financial services, finance lines, or other finance programmes

And more..

9.4 BY 2030, UPGRADE INFRASTRUCTURE AND RETROFIT INDUSTRIES TO MAKE THEM SUSTAINABLE, WITH INCREASED RESOURCE-USE EFFICIENCY AND GREATER ADOPTION OF CLEAN AND ENVIRONMENTALLY SOUND TECHNOLOGIES AND INDUSTRIAL PROCESSES, WITH ALL COUNTRIES TAKING ACTION IN ACCORDANCE WITH THEIR RESPECTIVE CAPABILITIES.

Tourism is a resource-intensive sector. Energy and water are essential for business operations and the comfort of clients. The majority of means of transport, such as airplanes, buses, and cars still use fossil fuels. However, there are opportunities for the transition to a net zero carbon sector and many efforts have already been made in the tourism sector. Tourism businesses can contribute to this target by upgrading infrastructures and retrofitting industries to make them more sustainable, to increase resource-use efficiency, and to adopt clean and environmentally sound technologies and processes. The certification of sustainable tourism practices for tourism businesses can provide, inter alia, an incentive for the integration of the main elements of sustainable tourism, improving good management practices and reducing the environmental and social impacts of services.

Potential indicators in this target are grouped by the following Theme and sub-theme:

- Tourism value chain / Tourism operations
- Sustainable consumption and production patterns / Sustainable operations

Examples of potential indicators:

- Total environmental protection expenditure and/or investment made by tourism businesses
- Number of sustainable practices in favour of environmental protection
- Whether there are advanced/innovative technologies in business operations, contributing to environmental conservation (Yes/No)

And more..
This target relates to the scientific research and technological capabilities through innovation and research and development. The tourism sector can contribute to this target by improving business efficiency by promoting innovation, digital transformation and ICT. Harnessing innovation and digital advances provide tourism with opportunities to become more sustainable and resilient, as well as to improve inclusiveness, local community empowerment, or efficient resource management.

Potential indicators in this target are grouped by the following Theme and sub-theme:

- **Business Development / MSMEs**
- **Business Development / Innovation**
- **Business Development / Research and development**

**Examples of potential indicators:**

- Number of programme/conferences which showcase tourism MSMEs best practices in research and development
- Number of initiatives that promote innovation due to the tourism project
- Total amount of research and development expenditure in tourism projects

And more..

9.C SIGNIFICANTLY INCREASE ACCESS TO INFORMATION AND COMMUNICATIONS TECHNOLOGY AND STRIVE TO PROVIDE UNIVERSAL AND AFFORDABLE ACCESS TO THE INTERNET IN LEAST DEVELOPED COUNTRIES BY 2020.

The tourism sector has seen a significant increase in the number of digital platforms and online services such as online travel agents, booking engines, etc. This has not only assisted in attracting tourists but also in connecting businesses. For both visitors and the local tourism business, high-speed Internet connection has become an essential infrastructure to reap the benefits of digital transformation. The availability of affordable access enables local tourism operators to connect with global markets and facilitates the promotion and marketing of a destination to potential visitors. This issue is closely related to infrastructure development as it highlights the importance of investing in ICT infrastructure to support the growth of the tourism sector.

Potential indicators in this target are grouped by the following Theme and sub-theme:

- **Information and communication technology / Internet connectivity**
- **Information and communication technology / Digital transformation**
- **Education and training / ICT training**

**Examples of potential indicators:**

- Percentage increase of residents in LDCs having access to the internet due to tourism development
- Number of tourism businesses using digital marketing services/ platforms
- Number of tourism businesses, including MSMEs, trained in ICT
